St Mark's Education Day

Masterclass: Pelvic exenteration for locally advanced and recurrent rectal cancers.

Target audience: Colorectal clinical nurse specialist, AHP's, Trainee's & other clinicians involved in supporting this patient group.

Aim:

To offer clinicians knowledge to guide post-operative management of individuals following a pelvic exenteration (PE).

By the end of the session, delegates will be able to:

- Understand what pelvic exenteration surgery entails and why it is undertaken.
- Identify what is normal after surgery as well as commonest complications.
- Recognise the importance of early interventions of any complications.
- Understand the impact of pelvic exenteration on psychological well-being and sexual function.

Date: Thursday 5th February 2026
